The Water Resources Plan for the Delaware River Basin would not have been possible without the dedication of many individuals and organizations. An array of individuals devoted many hours over the past four years crafting the language and setting the direction for improved water resource management.

Solid foundations are critical. This Plan builds on the vision and direction identified by the Flowing Toward the Future process in 1999 and acknowledges again the many people who sponsored and participated in that effort.

In addition to the members of the Delaware River Basin Commission and their respective supporting staff, the organizations listed below are to be commended and thanked for their unstinting support of the Plan throughout its development. A list of individuals who participated in the various committees—including the Watershed Advisory Council, the standing advisory committees of the Commission, and the ad hoc committees that were convened especially to support the development of this Plan—is found in Appendix A. Also included in the appendix are the talented individuals who facilitated the discussions, debates, deliberations and negotiations that are an inherent part of a multi-stakeholder planning process.

Finally, a generous grant from the William Penn Foundation enhanced the ability of many of the non-profit organizations to sustain participation throughout the development period and provided continuity for the meetings and workshops of the Watershed Advisory Council.

				<i>Support for enhancing public participation and regional cooperation in the development of this Plan was generously provided by a grant from the William Penn Foundation.</i>

It is the intent of this Basin Plan to engage all entities with responsibility or interest in water resources — as well as all whose actions affect our water resources — in partnerships for the protection and enhancement and efficient use of water.

The Basin Plan serves as a non-binding guide to the signatory parties and the Basin community. The Plan does not create any legal rights, nor is it intended to benefit any person or class of persons. The provisions of the Basin Plan are not enforceable against any of the signatory parties, their agencies, political subdivisions, officers, or employees or any other person. This Plan is not an Executive Order or regulation, does not have the force of law, and does not alter any existing legal requirement.
